

# Vacuum-Packed Articles Guide

## Opening and recovery instructions

**READ BEFORE OPENING**

### Before you begin

**01**

#### Safety cutter included

Use only the device provided inside the box.

**02**

#### Clean and dry surface

Unroll the article on a flat, clean, dry surface.

**03**

#### Recovery up to 72 h

In specific cases, recovery may take up to 96 h.

**1**

### Prepare the room

Take the box to the room where the article will be used.

**2**

### Remove from the box and unroll

Remove the article from the box and carefully unroll it on a clean, dry surface.

**3**

### Open carefully

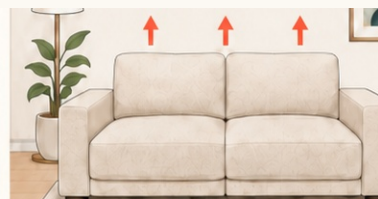

Use only the safety cutting device provided inside the box. Keep the tool away from the fabric while opening the plastic.

**4**

### Let it recover its shape

The article will begin to recover its shape as soon as it is opened. Adjust it gently by hand. In most cases, full recovery may take up to 72 hours.

In specific cases, full recovery may take up to 96 h.

# Recovery and care

## What to expect after opening

### During recovery

- The article begins to recover its shape as soon as it is opened.
- It is normal for wrinkles to appear. Some may not disappear completely.
- If you would like a more even finish, you may carefully use a steam iron suitable for the fabric.

### 1 Keep the room dry and ventilated

We recommend keeping the room dry and well ventilated during the recovery period.

### 2 Smooth the fabric

Wrinkles may appear after opening. Gently smooth the fabric by hand to help the material settle naturally.

### 3 Join the sections

Use the supplied connectors if they are applicable to your model.

### 4 Keep it dry

Place the article on a dry surface and avoid prolonged exposure to damp areas.

#### IMPORTANT

Do not use knives, blades or other sharp objects directly on the article. Use only the safety cutting device provided.
